Bill,

WOW, good eye. Thanks for the information.

Donna - I found the two documents on the R8 web sit at
<ftp://ftp.epa.gov/r8/pavilliondocs/QA_Documents/Audits_Of_Data_Quality_Lab_Results/Phase4/ADQ-Shaw-PhaseIV/OrganicAcidsAnalysisqueuePavillionWY.pdf> and
<ftp://ftp.epa.gov/r8/pavilliondocs/RawLabData/Phase4/Shaw_Low_Molecular_Weight_Acids_Phase_IV/7OA724SF_SS%236030_HPLC_queue.pdf>.

(I was looking for other items related to the FOIA, hit these, and thought they looked familiar.)

Hope this helps.

Bill

Donna - I have checked with our analysts, and this did not come from our (R8) lab, nor did it come from the ESAT lab here. It looks like two run sequences for ion-exclusion chromatography analysis. This type of analysis is used for organic acids and alcohols, but we don't do that here. Maybe these pages got mixed in with others from Greg O. That's about as much as I can do for you on this.

Subject: Mystery Document for Scanning

Bill,

When I picked up the files to be scanned for Pavillion from Phoebe's cubicle, I noticed a four page document laying on top of the files. Neither Phoebe nor I know if this document needs to be scanned or if it is even yours. Could you please take a look at it (attached) and let me know if you know what this document is? I would really appreciate it.

Thanks,
